

Working Together for You - δ Delta Primary Care Network (PCN)

Your GP practice is part of Delta PCN. This group of local practices works together - their goal is to improve capacity, access, and the variety of services offered.

What does this mean for you?

More appointment options faster with local access to a wider healthcare team. You might get appointments with:

GPs

Clinical Pharmacists

First Contact Physiotherapists (FCPs)

Respiratory Nurses

Health & Wellbeing Coaches

Mental Health Nurses

Podiatrists

These clinicians work alongside your GP practice team.

Why we work this way:

GP practices face increasing demand. They manage both long-term conditions and short-term minor illnesses for their patients. Working together increases funding and capacity. This helps us provide safe and appropriate care in a timely and sustainable manner.

The benefits:

Right care at the Right time, first time

Better-connected services

Strong and sustainable local GP practices for the future

PCN Hub Appointments:

Some services run from other member practice sites. You might need to go to another Delta PCN location for the best appointment. Your medical history will be available to the clinician for appointment.

Your registered GP practice remains responsible for your care
